

Ordnance Survey Accreditation for CDR Group Staff

CDR Group's already high level of expertise has been further enhanced by two of its key members of staff being awarded the status of Ordnance Survey Accredited Data Consultants. John levers (Director) and Darryl Beresford (Trainer/Consultant) have both been awarded the qualification after intensive training and examination by OS.

This means that CDR group can offer an enhanced service to its clients old and new, including detailed knowledge of OS MasterMap, its uses, structure and implementation. The accreditation also includes a deep understanding of OS's Positional Accuracy Improvements that many organisations are currently dealing with the implications of.
