

CDR Group Pick Up A Prestigious Web Mapping Oscar

Following the successful launch of Browse-A-Map at AGI'04, CDR Group has been awarded a prestigious "Oscar" in this years Web Mapping Contest , held by Directions Magazine.

The award was for Best Home Grown Map Renderer judged by Steve Lombardi of Microsoft:-

"... you meet a surprisingly quick and versatile map renderer built on .NET that can deal with MapInfo and ESRI formatted data and handles raster imagery in TIFF or JPG format."

The concept is simple and easy to deploy and without great expense.

More information is available on-line here.
