

## Further Movement In PAI Activities

CDR Group has recently delivered solutions to a new batch of clients tackling Ordnance Survey's Positional Accuracy Improvement Programme. CDR has been a Partner to TENET for both the resale and use of MapRite™ software in support of project work for well over a year now. The end and start of a new financial year for Local Authorities has seen another flurry of activity, building upon CDR's expertise in tackling this thorny issue of re-aligning GIS data with Ordnance Survey's new releases of digital map data.

Recent sales of the MapRite™ software – complete with training and support services - include Neath Port Talbot CBC, Teignbridge DC and Calderdale MBC. Meanwhile, CDR's project team has successfully undertaken bureau work for West Wiltshire DC and ongoing work with Derbyshire County Council, following a pilot exercise. As Ordnance Survey's PAI programme nears completion, there remains a great deal more work to be carried out.
