

MapInfo Professional v10.0.1 patch now available

This is an incremental patch that will update MapInfo Professional 10.0 to MapInfo Professional 10.0.1 Build 220. This patch can be applied to the release versions of MapInfo Professional 10.0 and MapInfo RunTime 10.0. This patch is not valid for any pre-releases of MapInfo Professional v10.0, MapBasic, or ProViewer. There are no user interface changes, and it can be safely applied to any localised releases of MapInfo Professional v10.0.

This can be downloaded from the PBBI website at

<http://www.pbinsight.com/support/product-downloads/item/mapinfo-professional-v10.0.1-maintenance-release>

or from within MapInfo by using the Help menu > Check for Updates

There are Release Notes with the download but in summary, the new release offers:

- ❖ Supports Windows 7.
- ❖ Offers improved co-ordinate system transformation for the UK.
- ❖ Improved performance for the Layer Control dialog
- ❖ Improved performance for the “Erase” and “Combine Objects Using Column” operations.
- ❖ Various bug fixes.

Watch out for a further release of Vertical Mapper in the coming months also.
