

MapInfo Professional 9.0.2 Patch Released

Pitney Bowes Software has made version 9.0.2 of MapInfo Professional available to download. Registered users of MapInfo professional version 9.0 can download the patch from the Help menu, by selecting > Check for Update.

The patch release addresses a number of known issues with Licence Registration and improving the raster handling tools.

There are also some New Features to this release:

Upgrades to the curved labelling capability

Various issues related to working with databases, Geocoding, importing/exporting, localisation, selection/querying and more

New projection support for Ireland and Germany
