

MapInfo Professional® Maintenance Release (v11.5.2) is Now Available

Another new release!

Pitney Bowes Software is pleased to announce the latest update to MapInfo Professional. This release is available for free to MapInfo Professional v11.5 users. You can obtain this update by opening MapInfo Professional 11.5, and selecting the “**Check for Update...**” option under the **Help menu**

- This new release has a number of new features and improvements.
- Display and Work with Your SQLite (*.sqlite) Data
- Handling Conversion of UTF-16 SQLite source data to ANSI MapInfo Professional table data
- Display of SQLite Column Types in MapInfo Professional
- New Web Feature Service (WFS) 1.1 Support
- Correcting how Web Map Service (WMS) Images Display on the Map
- Now Use Single Sign-On Credentials for Proxy Servers Accessing Map Services
- Performance Enhancement for the Browser Window
- Enhancements for the Legend Designer Window
- New Logging for Licensing
- Now Save More Details in the minidump File
- New Font Sets in MapInfo Professional
- Dialog Box Enhancements
- New Fill Patterns
- New File Versions and TAB, MIF/MID, and WOR Support
- MapInfo Manager 1.3 support with MapInfo Professional 11.5.2

MapInfo Professional supports SQLite databases through OSGeo FDO Data Access Technology, so that you can work with spatial data stored in SQLite database files. A format that you can use in both MapInfo and AutoCAD products
There are also some **MapInfo Supplemental Fonts** available to download from the PB Software site

For those who like to program with MapInfo MapBasic, there is also a patch to **MapBasic v11.5.2**.
