

CDR Group On Board With A Prestigious UKHO Contract

CDR Group are pleased to announce the successful award of a digitising contract with the UK Hydrographic Office in Taunton (part of the Ministry of Defence). The award follows a stringent series of tests to achieve accurate digitising of old Admiralty surveys into a computerised format. Indeed, the contract demands "double-digitising" of the information (similar to double-entry typing), where both sets of results are compared to ensure the utmost accuracy. The contract demands tight deadlines and high levels of Quality Assurance, which CDR has been able to demonstrate in winning this contract. The resulting data will be used by the UKHO in its digital mapping systems.
