

CDR's Quality System updated and audited

CDR first achieved the International Standard ISO 9001 standard back in 1994 - having started the process as the British Standard BS5750. This year, our processes have been amended to fit the newer ISO9001:2015 and once again received unequivocal approval from our external auditors NQA.

ISO 9001 is the internationally recognised standard for Quality Management Systems (QMS). It is the most widely used QMS standard in the world, with over 1.1 million certificates issued to organisations in 178 countries.

ISO 9001 provides a framework and set of principles that ensure a common-sense approach to the management of an organisation to consistently satisfy customers and other stakeholders. In simple terms, it provides the basis for effective processes and effective people to deliver an effective product or service time after time.
