Global Data Catalogue

As the world leader in Location Intelligence, Pitney Bowes Software maintains an extensive catalogue of over 350 unique datasets in 240 geographies worldwide. Highly detailed and accurate data to help you understand customer segments, manage risk and make decisions with confidence.

A new searchable data catalogue is available to browse online or download from www.mapinfo.com That will be followed shortly by an online data viewer
Other News

MapInfo version 12.0.3 is now available to download and MapInfo Stratus has just been updated to Release 40. **Please note that the Stratus Uploader Tool for MapInfo has been also upgraded.**

The MapInfo User Group is holding their next meeting in Birmingham on 30th January – come and see CDR on their stand and hear from users and Pitney Bowes Software. Join the User Group or register at www.muguk.com
