

## **MapInfo Pro v2019 is released!**

We are pleased to announce the release of MapInfo Pro v2019. This release is loaded with new features to increase your productivity and help your organisation make better location-based decisions.

How you'll benefit from MapInfo® Pro v2019

New SQL Window – Find, segment and update your data faster and easier

MapInfo Marketplace – Enhance your location analytics with customised apps

Map Layout Improvements – Make beautiful maps with new layout improvements via feature parity with 32-bit interface focusing on vector legends and line/fill style enhancements

Heat Mapping – Turn your data into insights using new, integrated heat mapping

Additional Programming Support – New support for .NET and Python providing more powerful extensions to MapInfo Pro and MapBasic enhancements.

If you would like to get a trial download for 30 days, please [click here](#)

Maintenance & Technical Support customers will shortly be receiving an email detailing how you can upgrade to v19 and your new Serial Numbers.

Please get in touch for a free trial if you're not in contract but interested in upgrading.
