

MapInfo Training News Spring 2019

2019 is sure to be a turbulent year - in February, there were days when we were defrosting the cars in the morning and sunbathing at lunch time! Although we can't help sort the weather out, we can help you have a bumper year using MapInfo. We run AGI accredited training courses at our CDR offices in the Peak District. These courses give you a thorough grounding in the software with small groups and lots of hands on experience.

We have three training course options:

32 to 64 bit Transition (1 day)

NEXT COURSE: 8th May 2019

Perfect for easing you into the new interface and ribbon menus. This is a new course for users who already have a working knowledge of MapInfo in 32bit but need help transitioning to the 64bit versions.

MapInfo Foundation (2 day)

NEXT COURSE: 14th & 15th May 2019

For newcomers to MapInfo or those who use it infrequently and want to cover the basics.

MapInfo Advanced (2 day)

NEXT COURSE: 23rd & 24th July 2019

For regular MapInfo users who already know the basics but want to learn more about everything MapInfo has to offer.

Please use our contact form to find out more.
