

MapInfo User Forum, London 4th June 2019

The MapInfo User Forum is just over a month away! Have you registered?

The UK MapInfo User Group Forum is an annual event which brings together Pitney Bowes technical experts, Product Managers, Partners and MapInfo users for a full day of networking, seminars and workshops. The day is sure to be informative with a panel of experts on hand to answer your questions, live tutorials using the latest version of MapInfo and presentations rich in real life case studies.

PLUS - we shall also see the launch of MapInfo v17.0.3 on the day, so the new features such as Python scripting and the "MapInfo Marketplace" for add-ins will be exciting.

CDR Group will be attending and have a stand in the Harris Suite. Please do come and say hi!
