

MapInfo v17.0.3 now available!

MapInfo v17.0.3 has just been released and is now available to download for all Maintenance & Technical Support customers.

New features include:

1. Python language support giving you the ability to include third party Python GIS applications or use the GDAL/OGR plug ins to create your own.
2. Improved Keyboard Shortcuts which are now accessible from the Pro tab under Options. You can now use one letter shortcuts as well as change the tool tips (text displayed when you hover over a tool).
3. MapInfo Marketplace preview which allows you to download and install additional tools from within MapInfo. More and more tools will be added in due course bringing one click in-house downloads to MapInfo. These are downloaded straight into the 'Tools' folder and don't require administrative privileges giving MapInfo users more freedom to use their software.

... v17.0.3 also includes over 24 bug fixes!
