

Upgrade those old licences to MapInfo 9.5 before Christmas

It is normal for old versions of MapInfo, pre-version 8.0, to fall into the category: Unable to Upgrade. Now until December 19th 2008, MapInfo users have the chance to upgrade version 7.8 or below to version 9.5.

As a part of this offer, users must purchase MATS (Maintenance and Technical Support) in year one. As it's normally not possible to upgrade legacy versions, this is a great opportunity to secure a copy of MapInfo 9.5 for £600 less than buying new.

Contact our Sales Team for a quote - you will get further discount if you are adding to a Volume Licence of 5 or more licences.
